Summary

Full-stack software engineer with experience in **ASP.NET Core**, C#, Java, Spring Boot, React, Angular, REST APIs, JWT authentication, and SQL databases. Built a deployed **AI Knowledge Base Assistant** using ASP.NET Core, React, Gemini API, and lightweight RAG. Strong foundation in OOP, API integration, service-layer architecture, prompt engineering, and AI-assisted development.

Experience

Java Developer Intern

Feb 2026 – Present

Sonali Intellect Limited, Dhaka, Bangladesh

- Developing backend services using **Java 17**, **Spring Boot**, REST APIs, and relational databases.
- Contributing to enterprise banking applications with **Angular**, TypeScript, JWT authentication, and secure API integration.
- Working with **MySQL** and **MS SQL Server** for data modeling, query handling, and transaction-based features.
- Collaborating in Agile workflows using Git, debugging tools, and API testing with Postman.
- Built a JSP/Servlet-based **Task Management System** using MVC, authentication, validation, and database operations.

Technical Skills

Languages	C#, Java, TypeScript, JavaScript, SQL, Python
Backend	ASP.NET Core, Spring Boot, REST APIs, EF Core, Spring Security, JSP/Servlets
Frontend	React.js, Angular, Next.js, Tailwind CSS, Bootstrap
AI Engineering	Gemini API, LLM API Integration, Prompt Engineering, Lightweight RAG, Document Chunking
Databases	SQLite, PostgreSQL, MS SQL Server, MySQL, MongoDB, H2
Tools	Git, GitHub, Docker, Postman, Swagger, Render, Vercel, VS Code, IntelliJ IDEA, Eclipse
Concepts	OOP, Service Layer Pattern, JWT Authentication, RBAC, MVC, Agile/Scrum, Microservices

Featured Projects

AI Knowledge Base Assistant 🔄

ASP.NET Core + AI Project

- Built a deployed AI document Q&A system using **ASP.NET Core Web API**, React, TypeScript, SQLite, JWT, and Gemini API.
- Implemented lightweight **RAG** with document chunking, keyword-based retrieval, prompt construction, and context-aware answers.
- Developed secure APIs for authentication, document management, AI chat, chat history, and Swagger testing.
- Stack: ASP.NET Core, C#, EF Core, SQLite, JWT, Gemini API, React, TypeScript, Tailwind CSS, Render, Vercel

Banking Microservices Application 🔄

Full-Stack Banking Project

- Developed a deployed banking application using **Spring Boot**, Angular, PostgreSQL, REST APIs, and JWT security.
- Implemented account management, deposit, withdrawal, transaction history, admin controls, and RBAC for CUSTOMER/ADMIN users.

- Added Angular guards, HTTP interceptor, CSV export, toast notifications, and **Chart.js analytics dashboard**.

• Stack: Java, Spring Boot, Spring Security, Angular, TypeScript, PostgreSQL, Chart.js, Render, Vercel

Cloud Restaurant Management System

ASP.NET Core Project

- Built restaurant management software using **ASP.NET Core**, C#, MS SQL Server, Razor Pages, and admin dashboard features.
- Stack: ASP.NET Core, C#, MS SQL Server, Razor Pages

NexTrip: Hybrid Blockchain Ride-Sharing Platform

Thesis Project

- Developed a decentralized ride-sharing platform using React.js, Ethereum smart contracts, Hyperledger Fabric, and React Native.
- Stack: React.js, React Native, Ethereum, Hyperledger Fabric, Node.js, Web3.js

For more projects visit [GitHub](#) and [Portfolio](#).

Publications

Conference Publications

Predicting Agricultural Land Suitability and Soil Quality: A Deep Learning Approach for Precision Agriculture  *Springer Conference*

- Developed a deep learning-based approach for agricultural land suitability and soil quality prediction.

NexTrip: A Semi-Public Blockchain Architecture for Privacy-Preserving Ride-Sharing with RAFT Consensus and IPFS-Enabled Data Storage  *IEEE ICCIT 2025*

- Proposed a privacy-preserving semi-public blockchain ride-sharing architecture using RAFT consensus and IPFS-enabled data storage.

Machine Learning for Monkeypox Prediction 

IEEE QPAIN 2025

- Compared CNN, SVM, and Decision Tree models for disease prediction.

Journal Publications

Design of Blockchain Ride-Sharing with IPFS 

IJAIT Journal

- Designed a scalable ride-sharing system architecture using IPFS and RAFT consensus.

Research Profile 

ResearchGate

Education

Bachelor of Science in Computer Science & Engineering

Ahsanullah University of Science and Technology (AUST)

CGPA: 3.105 / 4.00

Dec 2021 – Dec 2025

Certifications

Web Development Bootcamp	FreeCodeCamp & Scrimba (2025)
Advanced Graphics Design	Universe Computer Training Centre (2016)
Office Productivity Suite	Universe Computer Training Centre (2014)

Beyond Code

Activities: AUST Computer Club Member, Open Source Contributor, Tech Event Volunteer, participated in Inter Software Company Football Tournament representing Sonali Intellect

Interests: Robotics, Hackathons, Football, Competitive Programming
