Summary

Computer Science graduate and software developer with hands-on experience in building full-stack web applications, secure REST APIs, microservice architectures, database-driven systems, and AI-integrated solutions. Skilled in Java, Spring Boot, ASP.NET Core, React, Angular, SQL databases, JWT authentication, and modern deployment workflows. Experienced in developing enterprise banking software and real-world projects across microservices, AI document Q&A, restaurant management, healthcare, and blockchain-based ride-sharing, with published research work in AI, blockchain, and machine learning.

Experience

Java Developer Intern *Feb 2026 – Jul 2026*
Sonali Intellect Limited, Dhaka, Bangladesh

- Developed backend services using **Java 17**, **Spring Boot**, REST APIs, and relational databases in an enterprise banking environment.
- Contributed to enterprise banking applications with **Angular**, TypeScript, JWT authentication, and secure API integration.
- Worked with **MySQL** and **MS SQL Server** for data modeling, query handling, and transaction-based features.
- Collaborated in Agile workflows using Git, debugging tools, and API testing with Postman.
- Built a JSP/Servlet-based **Task Management System** using MVC, authentication, validation, and database operations.
- Developed a **Spring Boot microservice** for home energy tracking with RESTful APIs and service layer architecture.

Technical Skills

Languages	Java, C#, JavaScript, TypeScript, Python, Kotlin, SQL
Backend	Spring Boot, ASP.NET Core, REST APIs, Spring Security, EF Core, JSP/Servlets, Microservices
Frontend	React.js, Angular, Next.js, Tailwind CSS, Bootstrap
Databases	PostgreSQL, MySQL, MS SQL Server, SQLite, MongoDB, Firebase
AI & Research	LLM API Integration, Gemini API, Prompt Engineering, Lightweight RAG, Machine Learning Basics
Tools & Deployment	Git, GitHub, Docker, Postman, Swagger, Render, Vercel, Railway
Core Concepts	OOP, MVC, Microservice Architecture, Service Layer, JWT Authentication, RBAC, API Integration, Agile/Scrum

Featured Projects

Banking Microservices Application *Full-Stack Banking Project*

- Developed a deployed banking application using **Spring Boot**, Angular, PostgreSQL, REST APIs, and JWT security.
- Implemented account management, deposit, withdrawal, transaction history, admin controls, and RBAC for CUSTOMER/ADMIN users.
- Added Angular guards, HTTP interceptor, CSV export, toast notifications, and **Chart.js analytics dashboard**.
- Stack: Java, Spring Boot, Spring Security, Angular, TypeScript, PostgreSQL, Chart.js, Render, Vercel

AI Knowledge Base Assistant *ASP.NET Core + AI Project*

- Built a deployed AI document Q&A system using **ASP.NET Core Web API**, React, TypeScript, SQLite, JWT, and Gemini API.
- Implemented lightweight **RAG** with document chunking, keyword-based retrieval, prompt construction, and context-aware answers.
- Developed secure APIs for authentication, document management, AI chat, chat history, and Swagger testing.
- Stack: ASP.NET Core, C#, EF Core, SQLite, JWT, Gemini API, React, TypeScript, Tailwind CSS, Render, Vercel

Cloud Restaurant Management System *ASP.NET Core Project*

- Built restaurant management software using **ASP.NET Core**, C#, MS SQL Server, Razor Pages, and admin dashboard features.
- Stack: ASP.NET Core, C#, MS SQL Server, Razor Pages

NexTrip: Hybrid Blockchain Ride-Sharing Platform *Thesis Project*

- Developed a decentralized ride-sharing platform using React.js, Ethereum smart contracts, Hyperledger Fabric, and React Native.
- Stack: React.js, React Native, Ethereum, Hyperledger Fabric, Node.js, Web3.js

For more projects visit GitHub and Portfolio.

Publications

Conference Publications

Predicting Agricultural Land Suitability and Soil Quality: A Deep Learning Approach for Precision Agriculture *Springer Conference*

- Developed a deep learning-based approach for agricultural land suitability and soil quality prediction.

NexTrip: A Semi-Public Blockchain Architecture for Privacy-Preserving Ride-Sharing with RAFT Consensus and IPFS-Enabled Data Storage *IEEE ICCIT 2025*

- Proposed a privacy-preserving semi-public blockchain ride-sharing architecture using RAFT consensus and IPFS-enabled data storage.

Machine Learning for Monkeypox Prediction *IEEE QPAIN 2025*

- Compared CNN, SVM, and Decision Tree models for disease prediction.

Journal Publications

Design of Blockchain Ride-Sharing with IPFS *IJAIT Journal*

- Designed a scalable ride-sharing system architecture using IPFS and RAFT consensus.

Research Profile *ResearchGate*

Education

Bachelor of Science in Computer Science & Engineering
Ahsanullah University of Science and Technology (AUST) *Dec 2021 – Dec 2025*
CGPA: 3.105 / 4.00

Certifications

Web Development Bootcamp	FreeCodeCamp & Scrimba (2025)
Advanced Graphics Design	Universe Computer Training Centre (2016)
Office Productivity Suite	Universe Computer Training Centre (2014)

Beyond Code

Activities: AUST Computer Club Member, Open Source Contributor, Tech Event Volunteer, participated in Inter Software Company Football Tournament representing Sonali Intellect
Interests: Robotics, Hackathons, Football, Competitive Programming
